## 1. Course Outcomes:

Course Outcomes are the statements that help the learners to understand the reason for pursuing the course and help them to identify what he will be able to do at the end of the course. Course outcomes were framed for the courses of the B. Pharmacy and M. Pharmacy program by considering course/subject syllabus prescribed by Pharmacy Council of India. The following domains can be considered while writing the course outcomes.

1. Knowledge
2. Skill
3. Attitude
4. Problem solving ability.
5. Service to Society & Profession

Also, Bloom's Taxonomy has been applied while framing the COs and care has been taken that COs should be a measurable, observable, and specific statement that clearly indicates what a student should know and be able to do at end of course.

Course outcomes of all subjects of B. Pharmacy and M. Pharmacy were uploaded and updated on Vmedulife Learning Management System (LMS). COs are linked to course contents and mapped with question papers by using this LMS.

## 2. Program Outcomes

Program Outcomes (POs) are carefully crafted declarations that articulate the knowledge, skills, and attitudes—collectively referred to as attributes—that students are expected to have acquired upon completing a specific program. These outcomes are meticulously established with the primary goal of evaluating and quantifying the range of capabilities, skills, and competencies that students have successfully developed and internalized over the entire duration of the program. The program outcomes are achieved through curriculum that offers several mandatory courses as well as elective courses.

There are 11 POs prescribed by National Board of Accreditation (NBA) for Pharmacy Course and are listed below:

1. PO1: Pharmacy Knowledge,
2. PO2: Planning Abilities,
3. PO3: Problem Analysis,
4. PO4: Modern tool usage,
5. PO5: Leadership skills,
6. PO6: Professional Identity,
7. PO7: Pharmaceutical Ethics,
8. PO8: Communication,
9. PO9: The Pharmacist and society,
10. PO10: Environment and sustainability,
11. PO11: Life-long learning.

<b>Pharmacy Knowledge</b>	Possess knowledge and comprehension of the core and basic knowledge associated with the profession of pharmacy, including biomedical sciences; pharmaceutical sciences; behavioral, social, and administrative pharmacy sciences; and manufacturing practices.
Demonstrate effective planning abilities including time management, resource management, delegation skills and organizational skills. Develop and implement plans and organize work to meet deadlines.	<b>Planning Abilities</b>
<b>Problem Analysis</b>	Utilize the principles of scientific enquiry, thinking analytically, clearly and critically, while solving problems and making decisions during daily practice. Find, analyze, evaluate and apply information systematically and shall make defensible decisions.
Learn, select, and apply appropriate methods and procedures, resources, and modern pharmacy-related computing tools with an understanding of the limitations.	<b>Modern Tool Usage</b>
<b>Leadership Skills</b>	Understand and consider the human reaction to change, motivation issues, leadership and team-building when planning changes required for fulfillment of practice, professional and societal responsibilities. Assume participatory roles as responsible citizens or leadership roles when appropriate to facilitate improvement in health and wellbeing.
Understand, analyze and communicate the value of their professional roles in society (e.g. health care professionals, promoters of health, educators, managers, employers, employees).	<b>Professional Identity</b>
<b>Pharmaceutical Ethics</b>	Honour personal values and apply ethical principles in professional and social contexts. Demonstrate behavior that recognizes cultural and personal variability in values, communication and lifestyles. Use ethical frameworks; apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.
Communicate effectively with the pharmacy community and with society at large, such as, being able to comprehend and write effective reports, make effective presentations and documentation, and give and receive clear instructions.	<b>Communication</b>
<b>The Pharmacist and Society</b>	Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.
Understand the impact of the professional pharmacy solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.	<b>Environment and Sustainability</b>
<b>Life-long Learning</b>	Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. Self-assess and use feedback effectively from others to identify learning needs and to satisfy these needs on an ongoing basis.

## 4. CO Assessment Process and Tools:

The assessment process for course outcomes comprises of internal assessment and external assessment of students. The internal assessment (periodic test/sessional examination) is conducted by college and external assessment (semester/ end semester examination) is conducted by university. Vmedulife a cloud-based learning and academic management platform is used for CO and PO assessments.

In direct assessment of COs, first, COs are mapped based on sessional examination question papers. Subsequently, CO attainment is carried out for student performance in sessional examinations. For student performance in semester examination, neither mark scored by students in each question of semester examination, nor average/median marks are provided by university. Hence, we have set 50% as a target/threshold for semester examination results, and same target is kept for sessional examination results also.

Following direct assessment tools are used for assessing the COs, based on student performance in examinations,

Assessment Tool	Frequency
Sessional Examination	Two per semester per Course at the Institute level
Semester/ End Semester Examination	One at the end of the semester at the University level.
Continuous Evaluation mode	Throughout semester at Institute level

**The details of CO attainment process are as under,**

- The attainment of course outcomes have been carried out based on performance of students in internal assessment and external assessments. Weightages have been assigned to assessment tools based on schemes for internal assessments and end semester examinations given in syllabus.
- As per CBCS curriculum, internal assessment has a weightage of 25% for theory, and 30% for practical. And, for semester examination, weightage of theory and practical examination is 75% and 70% respectively. Internal assessment includes sessional examinations, and

continuous mode evaluation. Continuous mode evaluation of theory sessional examinations considers attendance, quizzes, assignment, open book test, field work, group discussion and seminar, student–teacher interaction. Whereas, continuous mode evaluation of practical sessional examination, is based on attendance, practical records, regular viva voce.

- For certain courses, non-university examinations have been prescribed in the curriculum. For some courses having non-university examination, the weightage of internal assessment and end semester examination is prescribed as 30% and 70% for theory and 40% and 60% for practical respectively, whereas, for remaining courses having non-university examination the weightage has been prescribed as 33% and 67% for theory respectively.
- As university does not provide average or median marks, we have set University pass percentage as 50% as the target/threshold level for both theory courses and practical courses separately.

## Attainment Levels and Weightages:

For assigning scores to the student performance in assessment, the following levels have been considered for attainment calculations.

- *If up to 60% of students have scored marks more than target, then the level is considered as low (Level 1).*
- *If 60% to 70% of students have scored marks more than target, then the level is considered as medium (Level2).*
- *If 70% or more of students have scored marks more than target, then the level is considered as high (Level 3).*

Weightages for different exam modules of B. Pharmacy and M. Pharmacy have been assigned based on marking scheme prescribed in syllabus. Weightages assigned to different exam modules is as follows:

## 5. Method of Assessment of POs:

Program Outcome attainment levels for all POs are set first and then attainment levels are evaluated by two assessment methods.

1. **Direct assessment methods** such as student performance in internal assessment & end semester examination of both theory & Practical considered for attainment of POs.
2. **Indirect assessment method** which includes students exit survey, parent survey and GPAT etc.

### Direct Assessment tools and processes

For attainment of POs, direct assessment has been performed using internal assessment and end semester examination results as a tool. Various direct assessment tools used for assessing the students, with aim, frequency, POs mapped have been tabulated below.

In direct assessment, COs are mapped based on sessional examination question papers. The question wise performance of students in sessional examination is recorded and CO attainments are calculated. For semester examination, neither mark scored by students in each question, nor average/median marks are provided by university, hence, marks scored by every student in each course are used to calculate COs attained. The target has been set as 50% for both sessional and semester examinations. The contribution of performance in sessional and semester examination towards attainment of COs is kept in accordance with the weightage of both prescribed in curriculum. COs are mapped with POs and based on percentage of CO attained PO attainment is calculated. The weightage of direct attainment in final attainment of POs has been kept at 80%.

Following direct assessment tools are used for assessment of COs and subsequent POs as follows,

Assessment Tool	Aim	Frequency	Program Outcome
Sessional Examination	To assess the understanding, knowledge gained, and practical skills acquired by the students	Two per semester per Course at the Institute level	All POs
Continuous Evaluation mode	To assess attendance, knowledge, skills, attitude of students	Throughout semester at Institute level	All POs
End Semester Examination	To assess the understanding, knowledge gained, and practical skills acquired by the students	One at the end of the semester at the University level.	All POs

### Indirect Assessment Tools and Processes

In an indirect assessment, extracurricular, co-curricular activity outcomes are analyzed along with the feedback given by students for different activities. Feedback/surveys taken/performed periodically are tabulated below as an assessment tool employed. These tools (Feedback/surveys) are further analyzed for activity outcome (AO) attainments. Feedbacks are received on the basis of a rating scale of 1 to 3 for specific AO, where 3 indicates an excellent rating. AO attainment is calculated as an average rating. This average rating is used to calculate PO attainment by considering desired AO-PO mapping.

The total contribution of Indirect Assessment tools and processes towards attainment of POs is 20%.

## List of. Feedback/surveys taken/performed:

Assessment Tool/Feedback	Aim	Frequency
Placement and Entrepreneurship Development Cell (EDC)	To assess the efforts put by college towards placement of students and inculcation of entrepreneurship culture in them. To assess the adequacy of job opportunities availed to students	After graduation of students and activities taken by placement cell.
Program Exit Survey	To assess the contribution of B. Pharmacy Program in overall development of students. To assess their preparedness for career likely to be opted	Every year after graduation of students
Industrial In-Plant Training	To assess observational and practical skills acquired by students and application of industrial scenario in academic mileu. To assess changes occurred in students in interpersonal relations.	After third/Final year of program
Professional Activities	To assess the professional attitude and ethics inculcated along with sense of responsibility discharged towards society	After every academic year
Student Projects and Research	To assess the problem identification and problem-solving attitude built. Also assess the logical and rational thinking	At the end of Final Year B. Pharm & M. Pharm
Co-curricular Activities	Improvement in planning abilities, communications skills, leadership qualities, and research orientation is assessed	After every academic year
GPAT & Competitive Exam	To assess planning abilities, improved knowledge, critical thinking and patience imparted	Every year after GPAT results
Alumni Survey	Assessment of effectiveness of program towards career plan attainments	Round the year/ during Alumni meet
Employer Survey	Quality of graduates is assessed through employer survey	Round the year

Assessment Tool/Feedback	Aim	Frequency
Health care activities	To assess the health awareness created, societal healthcare problems identified and sorted out	After every academic year
NSS and Social Activities	Inculcation of social and ethical values along with health and hygiene awareness is assessed.	Once in a year after NSS activity
Sports Facilities and Activities	Improved health, sportsmanship spirit, and team performance skills are assessed	After sports week, every year
Cultural Activities	To assess performing skills and overall persona.	Once in a year at the time of term end.
Professional Visit	Assessment of observation skills and ability to correlate classroom studies to industrial and field scenario.	Every year after visit
Skill Development Programs	To assess the improvements brought about in overall personality of students.	After each Soft skill enhancement activity
Lab Equipment, CFC and Technical Services	To evaluate students' experience, learning gains, and satisfaction with lab equipment, CFC, and technical services and accordingly do improvements.	Once in a year at the time of term end.
Library	To assess students' usage, satisfaction, and learning outcomes associated with the library's resources and services.	Once in a year at the time of term end.
